Independent Auditors' Report

To the Board of Directors of
Travis County Water Control and Improvement District - Point Venture:

Opinions

We have audited the financial statements of the governmental activities and each major fund of Travis County Water Control and Improvement District - Point Venture (the "District"), as of and for the year ended September 30, 2024, and the related notes to the financial statements, which collectively comprise the District's basic financial statements as listed in the table of contents.

In our opinion, the accompanying financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities and each major fund of the District as of September 30, 2024, and the respective changes in financial position for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinions

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the District, and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the District's ability to continue as a going concern for twelve months beyond the financial statement date, including any currently known information that may raise substantial doubt shortly thereafter.

Auditors' Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinions. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with generally accepted auditing standards will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with generally accepted auditing standards, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the District's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the District's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis and budgetary comparison information be presented to supplement the basic financial statements. Such information is the responsibility of management and, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Supplementary Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the District's basic financial statements. The Texas supplemental information listed in the table of contents is presented for purposes of additional analysis and is not a required part of the basic financial statements. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the basic financial statements. The information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the Texas supplemental information listed in the table of contents is fairly stated, in all material respects, in relation to the basic financial statements as a whole.

**TRAVIS COUNTY WATER CONTROL AND IMPROVEMENT DISTRICT -
POINT VENTURE
MANAGEMENT'S DISCUSSION AND ANALYSIS
YEAR ENDED SEPTEMBER 30, 2024**

In accordance with Governmental Accounting Standards Board Statement No. 34 ("GASB 34"), the management of Travis County Water Control and Improvement District - Point Venture (the "District") offers the following discussion and analysis to provide an overview of the District's financial activities for the year ended September 30, 2024. Since this information is designed to focus on the current year's activities, resulting changes, and currently known facts, it should be read in conjunction with the District's financial statements that follow.

FINANCIAL HIGHLIGHTS

- *General Fund:* At the end of the current fiscal year, the unassigned fund balance was \$3,679,913, an increase of \$1,467,460 from the previous fiscal year. General Fund revenues increased from \$2,836,038 in the previous fiscal year to \$3,343,001 in the current fiscal year due to an increase in the tax rate allocated to maintenance and operations and assessed valuation as well as an increase in service revenue resulting from an adjustment in the service rates.
- *Debt Service Fund:* Fund balance restricted for debt service increased from \$780,044 in the previous fiscal year to \$891,258 in the current fiscal year. Debt Service Fund revenues decreased from \$1,485,875 in the previous fiscal year to \$1,365,179 in the current fiscal year due to a decrease in the District's tax rate allocated to the Debt Service Fund.
- *Capital Projects Fund:* Fund balance decreased from \$13,355,408 in the previous fiscal year to \$8,267,354 in the current fiscal year. The District expended \$5,661,738 for bond related projects during the year.
- *Governmental Activities:* On a government-wide basis for governmental activities, the District had revenues, net of expenses of \$2,588,359, in the current fiscal year. Net position increased from \$6,103,002 to \$8,691,361.

OVERVIEW OF THE DISTRICT

The District was created, organized and established on October 14, 1970, by the Texas Water Commission pursuant to the provisions of Chapter 51 of the Texas Water Code. The reporting entity of the District encompasses those activities and functions over which the District's elected officials exercise significant oversight or control. The District is governed by a five member Board of Directors which has been elected by District residents or appointed by the Board of Directors. The District is not included in any other governmental "reporting entity" as defined by GASB Statement No. 14, since Board members are elected by the public and have decision making authority, the power to designate management, the responsibility to significantly influence operations and primary accountability for fiscal matters. In addition, there are no component units as defined in GASB Statements No. 14 and No. 39 which are included in the District's reporting entity.

MANAGEMENT'S DISCUSSION AND ANALYSIS
YEAR ENDED SEPTEMBER 30, 2024**

USING THIS ANNUAL REPORT

This annual report consists of five parts:

1. *Management's Discussion and Analysis* (this section)
2. *Basic Financial Statements*
3. *Notes to the Basic Financial Statements*
4. *Required Supplementary Information*
5. *Texas Supplemental Information* (required by the Texas Commission on Environmental Quality (the TSI section))

For purposes of GASB 34, the District is considered a special purpose government. This allows the District to present the required fund and government-wide statements in a single schedule. The requirement for fund financial statements that are prepared on the modified accrual basis of accounting is met with the "Governmental Funds Total" column. An adjustment column includes those entries needed to convert to the full accrual basis government-wide statements. Government-wide statements are comprised of the Statement of Net Position and the Statement of Activities.

OVERVIEW OF THE FINANCIAL STATEMENTS

The *Statement of Net Position and Governmental Funds Balance Sheet* includes a column (titled "Governmental Funds Total") that represents a balance sheet prepared using the modified accrual basis of accounting. This method measures cash and all other financial assets that can be readily converted to cash. The adjustments column converts those balances to a balance sheet that more closely reflects a private-sector business. Over time, increases or decreases in the District's net position will indicate financial health.

The *Statement of Activities and Governmental Funds Revenues, Expenditures and Changes in Fund Balances* includes a column (titled "Governmental Funds Total") that derives the change in fund balances resulting from current year revenues, expenditures, and other financing sources or uses. These amounts are prepared using the modified accrual basis of accounting. The adjustments column converts those activities to full accrual, a basis that more closely represents the income statement of a private-sector business.

The *Notes to the Basic Financial Statements* provide additional information that is essential to a full understanding of the information presented in the *Statement of Net Position and Governmental Funds Balance Sheet* and the *Statement of Activities and Governmental Funds Revenues, Expenditures, and Changes in Fund Balances*.

The *Required Supplementary Information* presents a comparison statement between the District's adopted budget and its actual results.

Revenues were \$5,282,423 for the fiscal year ended September 30, 2024 while expenses were \$2,694,064. Net position increased by \$2,588,359.

Property taxes totaled \$3,224,902 for the fiscal year ended September 30, 2024. Included in these taxes are real and personal property taxes which are assessed October 1 and payable before the following January 31.

The District's assessed value in fiscal year 2024 was approximately \$478 million compared to approximately \$420 million in fiscal year 2023. The tax rate is set after reviewing the operating and debt service requirements and appraised values determined by Travis County. The ad valorem tax rate for fiscal years 2024 and 2023 was \$0.6722 and \$0.7000 per \$100 assessed valuation, respectively. The District's primary revenue sources are service account fees and property taxes.

1. SIGNIFICANT ACCOUNTING POLICIES

The accounting and reporting policies of Travis County Water Control and Improvement District - Point Venture (the "District") relating to the funds included in the accompanying financial statements conform to generally accepted accounting principles ("GAAP") as applied to governmental entities. GAAP for local governments include those principles prescribed by the *Governmental Accounting Standards Board* ("GASB"), which constitutes the primary source of GAAP for governmental units. The more significant of these accounting policies are described below and, where appropriate, subsequent pronouncements will be referenced.

Reporting Entity - The District was created, organized and established on October 14, 1970, by the Texas Water Commission pursuant to the provisions of Chapter 51 of the Texas Water Code. The reporting entity of the District encompasses those activities and functions over which the District's elected officials exercise significant oversight or control. The District is governed by a five member Board of Directors (the "Board") which has been elected by District residents or appointed by the Board. The District is not included in any other governmental "reporting entity" as defined by GASB Statement No. 14, since Board members are elected by the public and have decision making authority, the power to designate management, the responsibility to significantly influence operations and primary accountability for fiscal matters. In addition, there are no component units included in the District's reporting entity. In January 2019, the District terminated all full-time employees and began using external consultants to perform the operations of the District.

Basis of Presentation - Government-Wide and Fund Financial Statements - The basic financial statements are prepared in conformity with GASB Statement No. 34, and include a column for government-wide (based upon the District as a whole) and fund financial statement presentations. GASB Statement No. 34 also requires as supplementary information the Management's Discussion and Analysis, which includes an analytical overview of the District's financial activities. In addition, a budgetary comparison statement is presented that compares the final amended General Fund budget with actual results.

- **Government-Wide Financial Statements**

The District's Statement of Net Position includes both non-current assets and non-current liabilities of the District, which were previously recorded in the General Fixed Assets Account Group and the General Long-Term Debt Account Group. In addition, the government-wide Statement of Activities column reflects amortization and depreciation expense on the District's capital assets, including infrastructure, and original issue discounts.

1. SIGNIFICANT ACCOUNTING POLICIES (continued) -

- **Government-Wide Statements (continued) -**

The government-wide focus is more on the sustainability of the District as an entity and the change in aggregate financial position resulting from financial activities of the fiscal period. The focus of the fund financial statements is on the individual funds of the governmental categories. Each presentation provides valuable information that can be analyzed and compared to enhance the usefulness of the information.

- **Fund Financial Statements**

Fund based financial statement columns are provided for governmental funds. GASB Statement No. 34 sets forth minimum criteria (percentage of assets and deferred outflows of resources, liabilities and deferred inflows of resources, revenues or expenditures of either fund category) for the determination of major funds. All of the District's funds are reported as major funds.

Governmental Fund Types - The accounts of the District are organized and operated on the basis of funds, each of which is considered to be a separate accounting entity. The operations of each fund are accounted for with a self-balancing set of accounts that comprise its assets, deferred outflows of resources, liabilities, deferred inflows of resources, fund balances, revenues and expenditures. The various funds are grouped by category and type in the financial statements. The District maintains the following fund types:

- **General Fund** - The General Fund accounts for financial resources in use for general types of operations which are not encompassed within other funds. This fund is established to account for resources devoted to financing the general services that the District provides for its residents. Tax revenues and other sources of revenue used to finance the fundamental operations of the District are included in this fund.
- **Debt Service Fund** - The Debt Service Fund is used to account for the accumulation of resources for, and the payment of, debt principal, interest and related costs.
- **Capital Projects Fund** - The Capital Projects Fund is used to account for financial resources to be used for the acquisition or construction of major capital facilities.

Non-Current Governmental Assets and Liabilities - GASB Statement No. 34 eliminates the presentation of Account Groups, but provides for these records to be maintained and incorporates the information into the government-wide financial statement column in the Statement of Net Position.

1. SIGNIFICANT ACCOUNTING POLICIES (continued) -

Basis of Accounting

- **Governmental Funds**

- **Government-Wide Statements** - The government-wide financial statement column is reported using the economic resources measurement focus and the accrual basis of accounting. Revenues are recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of the related cash flows. Property taxes are recognized as revenues in the year for which they are levied.
- **Fund Financial Statements** - The accounting and financial reporting treatment applied to a fund is determined by its measurement focus. All governmental fund types are accounted for using a current financial resources measurement focus. With this measurement focus, only current assets, deferred outflows of resources, current liabilities, and deferred inflows of resources generally are included on the balance sheet. Operating statements of these funds present increases (i.e., revenues and other financing sources) and decreases (i.e., expenditures and other financing uses) in the net fund balance. Governmental funds are accounted for on the modified accrual basis of accounting. Under the modified accrual basis of accounting, revenues are recorded when susceptible to accrual (i.e., both measurable and available).

“Measurable” means that the amount of the transaction can be determined and “available” means the amount of the transaction is collectible within the current period or soon enough thereafter to be used to pay liabilities of the current period.

Expenditures, if measurable, are generally recognized on the accrual basis of accounting when the related fund liability is incurred. Exceptions to this general rule include the unmatured principal and interest on general obligation long-term debt which is recognized when due. This exception is in conformity with GAAP.

Property tax revenues are recognized when they become available. In this case, available means when due, or past due and receivable within the current period and collected within the current period or soon enough thereafter to be used to pay liabilities of the current period. Such time thereafter shall not exceed 60 days. Tax collections expected to be received subsequent to the 60-day availability period are reported as deferred inflows of resources. All other revenues of the District are recorded on the accrual basis in all funds.

1. SIGNIFICANT ACCOUNTING POLICIES (continued) -

Basis of Accounting

- **Governmental Funds (continued)**
 - **Fund Financial Statements (continued)** - The District reports deferred inflows of resources on its balance sheet. Deferred inflows arise when a potential revenue does not meet both the “measurable” and “available” criteria for recognition in the current period. In subsequent periods, when revenue recognition criteria are met, the balance for deferred inflows of resources is removed from the balance sheet and revenue is recognized.

Budgets and Budgetary Accounting - A budget was adopted on September 28, 2023 for the General Fund on a basis consistent with GAAP. The District’s Board utilizes the budget as a management tool for planning and cost control purposes.

Cash and Cash Equivalent Investments - Cash and cash equivalent investments include cash on deposit as well as investments with original maturities of three months or less. The investments, consisting of an external local government investment pool and U.S. Treasury State and Local Government Series securities, are recorded at either amortized cost or fair value.

Accounts Receivable - The District provides for uncollectible accounts receivable using the allowance method of accounting for bad debts. Under this method of accounting, a provision for uncollectible accounts is charged to earnings. The allowance account is increased or decreased based on past collection history and management’s evaluation of accounts receivable. All amounts considered uncollectible are charged against the allowance account, and recoveries of previously charged off accounts are added to the allowance. The District established an allowance for doubtful accounts of \$451 at September 30, 2024.

Ad Valorem Property Taxes - Property taxes, penalties, and interest are reported as revenue in the fiscal year in which they become available to finance expenditures of the District. Allowances for uncollectible property taxes are based upon historical experience in collecting property taxes. Uncollectible personal property taxes are periodically reviewed and written off, but the District is prohibited from writing off real property taxes without specific statutory authority from the Texas Legislature.

Prepaid Expenses - Certain payments to vendors reflect costs applicable to future accounting periods and are recorded as prepaid expenses in both the government-wide and fund financial statements. Prepaid expenses shall be charged to expenditures when consumed.

1. SIGNIFICANT ACCOUNTING POLICIES (continued) -

Capital Assets - Capital assets, which include land and easements, construction in progress, office equipment, machinery and equipment, buildings and improvements, a distribution system, and water and wastewater facilities, are reported in the government-wide column in the Statement of Net Position. Public domain (“infrastructure”) capital assets, including distribution systems and water and wastewater facilities, are capitalized. Items purchased or acquired are reported at historical cost or estimated historical cost. Contributed fixed assets are recorded as capital assets at estimated acquisition value at the time received.

Capital assets (other than land and easements and construction in progress) are depreciated using the straight-line method over the following estimated useful lives:

Asset	Years
Infrastructure	30
Building and improvements	10-40
Water and sewer plant	30
Machinery and equipment	5-10
Office equipment	5-10

Interfund Transactions - Transfers from one fund to another fund are reported as interfund receivables and payables if there is intent to repay that amount and if the debtor fund has the ability to repay the advance on a timely basis. Operating transfers represent legally authorized transfers from the fund receiving resources to the fund through which the resources are to be expended.

Long-Term Debt - In the government-wide financial statements, long-term debt and other long-term obligations are reported as liabilities in the applicable governmental activities Statement of Net Position. Bond premiums and original issue discounts are deferred over the life of the bonds. Bonds payable are reported net of the applicable bond premiums or discounts.

In the fund financial statements, governmental fund types recognize bond premiums and discounts during the current period. The face amount of debt issued is reported as other financing sources. Premiums received on debt issuances are reported as other financing sources while discounts on debt issuances are reported as other financing uses.

Bond issuance costs, whether or not withheld from the actual debt proceeds received, are reported as debt service expenditures in both the government-wide and the fund financial statements.

1. SIGNIFICANT ACCOUNTING POLICIES (continued) -

Deferred Outflows and Deferred Inflows of Resources - The District complies with GASB Statement No. 63, *Financial Reporting of Deferred Outflows of Resources, Deferred Inflows of Resources, and Net Position*, which provides guidance for reporting the financial statement elements of deferred outflows of resources, which represent the consumption of the District's net position that is applicable to a future reporting period, and deferred inflows of resources, which represent the District's acquisition of net position applicable to a future reporting period.

The District complies with GASB Statement No. 65, *Items Previously Reported as Assets and Liabilities*, which establishes accounting and financial reporting standards that reclassify, as deferred outflows of resources or deferred inflows of resources, certain items that were previously reported as assets and liabilities and recognizes, as outflows of resources or inflows of resources, certain items that were previously reported as assets and liabilities.

Fund Equity - The District complies with GASB Statement No. 54, *Fund Balance Reporting and Governmental Fund Type Definitions*, which establishes fund balance classifications that comprise a hierarchy based primarily on the extent to which a government is bound to observe constraints imposed upon the use of the resources reported in governmental funds. See Note 10 for additional information on those fund balance classifications.

Accounting Estimates - The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amount of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenditures during the reporting period. Actual results could differ from those estimates.

Fair Value Measurements - The District complies with GASB Statement No. 72, *Fair Value Measurement and Application*, which defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction. Fair value accounting requires characterization of the inputs used to measure fair value into a three-level fair value hierarchy as follows:

- Level 1 inputs are based on unadjusted quoted market prices for identical assets or liabilities in an active market the entity has the ability to access.
- Level 2 inputs are observable inputs that reflect the assumptions market participants would use in pricing the asset or liability developed based on market data obtained from sources independent from the entity.
- Level 3 inputs are unobservable inputs that reflect the entity's own assumptions about the assumptions market participants would use in pricing the asset or liability developed based on the best information available.

1. SIGNIFICANT ACCOUNTING POLICIES (continued) -

There are three general valuation techniques that may be used to measure fair value:

- Market approach - uses prices generated by market transactions involving identical or comparable assets or liabilities
- Cost approach - uses the amount that currently would be required to replace the service capacity of an asset (replacement cost)
- Income approach - uses valuation techniques to convert future amounts to present amounts based on current market expectations

2. RECONCILIATION OF THE GOVERNMENTAL FUNDS

Adjustments to convert the Governmental Funds Balance Sheet to the Statement of Net Position are as follows:

Fund balances - total governmental funds		\$ 12,838,525

3. CASH, CASH EQUIVALENTS, AND INVESTMENTS

The District's deposits are required to be secured in the manner provided by law for the security of the funds. Custodial credit risk is the risk that in the event of a bank failure, the District's deposits may not be returned to it. The District's investment policy requires that the District's deposits be fully insured by Federal Deposit Insurance Corporation ("FDIC") insurance or collateralized with obligations of the United States or its agencies and instrumentalities. At September 30, 2024, the carrying amount of the District's deposits was \$206,146 and the bank balance was \$261,576. At September 30, 2024, the District's deposits were fully collateralized by FDIC insurance or by pledged collateral.

The investment policies of the District are governed by Section 2256 of the Texas Government Code (the "Public Funds Investment Act") and an adopted District Investment Policy that includes depository contract provisions and custodial contract provisions. The Public Funds Investment Act authorizes the District to invest in funds under a written investment policy, which is approved annually by the Board. Major provisions of the District's investment policy, which complies with the Public Funds Investment Act, include: depositories must be FDIC insured Texas banking institutions; depositories must fully insure or collateralize all demand and time deposits; and securities collateralizing time deposits are held by independent third party trustees. The primary objectives of the District's investment strategy, in order of priority, are safety of principal, liquidity, and yield.

3. CASH, CASH EQUIVALENTS, AND INVESTMENTS (continued) -

Interest rate risk - In accordance with its investment policy, the District manages its exposure to declines in fair values through investment diversification and limiting investments as follows:

- Money market mutual funds are required to have weighted average maturities of 90 days or fewer; and
- Other mutual fund investments are required to have weighted average maturities of less than two years.

Credit risk - The District's investment policy requires the application of the prudent-person rule: Investments are made as a prudent person would be expected to act, with discretion and intelligence, and considering the probable safety of their capital as well as the probable income to be derived. The District's investment policy requires that District funds be invested in:

- Obligations of the United States Government and/or its agencies and instrumentalities; or
- Money market mutual funds with investment objectives of maintaining a stable net asset value of \$1 per share; or
- Mutual funds rated in one of the three highest categories by a nationally recognized rating agency; or
- Securities issued by a State or local government or any instrumentality or agency thereof, in the United States, and rated in one of the three highest categories by a nationally recognized rating agency; or
- Public funds investment pools rated AAA or AAAM by a nationally recognized rating agency.

At September 30, 2024, the District held the following cash equivalents and investments:

Investment	Fair Value at 9/30/2024	Weighted Average Maturity (Days)	Investment Rating

3. CASH, CASH EQUIVALENTS AND INVESTMENTS (continued) -

The Comptroller of Public Accounts is the sole officer and director of the Texas Treasury Safekeeping Trust Company, which is authorized to operate the Texas Local Government Investment Pool ("TexPool"). Although TexPool is not registered with the SEC as an investment company, they operate in a manner consistent with the SEC's Rule 2a-7 of the Investment Company Act of 1940. TexPool also has an advisory board to advise on TexPool's investment policy. This board is made up equally of participants and nonparticipants who do not have a business relationship with TexPool. Federated Investors is the investment manager for the pool and manages daily operations of TexPool under a contract with the Comptroller. TexPool's investment policy stipulates that it must invest in accordance with the Public Funds Investment Act. These investments are stated at amortized cost in accordance with GASB Statement No. 31, *Accounting and Financial Reporting for Certain Investments and for External Investment Pools* and as permitted by GASB Statement No. 79, *Certain External Investment Pools and Pool Participants*.

In accordance with GASB Statement No. 79, the external local government investment pool does not have any limitations and restrictions on withdrawals such as notice periods or maximum transaction amounts. This pool does not impose any liquidity fees or redemption gates.

The District also invests in U.S. Treasury State and Local Government Series (SLGS) securities in order to assist with compliance with yield restriction and arbitrage rate rebate provisions of the Internal Revenue Code. These investments are valued using Level 2 inputs that are based on market data obtained from independent sources. The investments are reported by the District at fair value in accordance with GASB Statement No. 72.

Concentration of credit risk - In accordance with the District's investment policy, investments in individual securities are to be limited to ensure that potential losses on individual securities do not exceed the income generated from the remainder of the portfolio. As of September 30, 2024, the District did not own any investments in individual securities as the U.S. Treasury State and Local Government Series (SLGS) securities are demand deposit types of securities that have a weighted average maturity of one day.

4. PROPERTY TAXES

Property taxes attach as an enforceable lien on January 1. Taxes are levied on or about October 1, are due on November 1, and are past due the following February 1. The Travis Central Appraisal District established appraisal values in accordance with requirements of the Texas Legislature. The District levies taxes based upon the appraised values. The Travis County Tax Assessor Collector bills and collects the District's property taxes. The Board set the tax rates for the 2024 fiscal year (2023 tax year) on September 28, 2023.

7. LONG-TERM DEBT (continued) -

\$891,258 is available in the Debt Service Fund to service the bonded debt as of September 30, 2024. All authorized tax bonds have been issued by the District at September 30, 2024.

8. COMMITMENTS AND CONTINGENCIES

The developers of the land within the District have incurred costs for construction of facilities, as well as costs pertaining to the creation and operation of the District. Claims for reimbursement of construction costs and operational advances will be evaluated upon receipt of adequate supporting documentation and proof of contractual obligation. Such costs may be reimbursable to the developer by the District from cash and cash equivalent investments held in the Capital Projects Fund, subject to approval by the Texas Commission on Environmental Quality, or from operations.

9. RISK MANAGEMENT

The District is exposed to various risks of losses related to torts; theft of, damage to, and destruction of assets; errors and omissions; and natural disasters. The District has obtained coverage from commercial insurance companies and the Texas Municipal League Intergovernmental Risk Pool ("TML Pool") to effectively manage its risk. All risk management activities are accounted for in the General Fund. Expenditures and claims are recognized when it is probable that a loss has occurred and the amount of the loss can be reasonably estimated. In determining claims, events that might create claims, but for which none have been reported, are considered.

The TML Pool was established by various political subdivisions in Texas to provide self-insurance for its members and to obtain lower costs for insurance. TML Pool members pay annual contributions to obtain the insurance. Annual contribution rates are determined by the TML Pool Board. Rates are estimated to include all claims expected to occur during the policy including claims incurred but not reported. The TML Pool has established claims reserves for each of the types of insurance offered. Although the TML Pool is a self-insured risk pool, members are not contingently liable for claims filed above the amount of the fixed annual contributions. If losses incurred are significantly higher than actuarially estimated, the TML Pool adjusts the contribution rate for subsequent years. Members may receive returns of contributions if actual results are more favorable than estimated.

10. FUND BALANCES

The District complies with GASB Statement No. 54, *Fund Balance Reporting and Governmental Fund Type Definitions*, which establishes fund balance classifications that comprise a hierarchy based primarily on the extent to which a government is bound to observe constraints imposed upon the use of the resources reported in governmental funds. Those fund balance classifications are described below.

- Nonspendable - Amounts that cannot be spent because they are either not in a spendable form or are legally or contractually required to be maintained intact. The District had no such amounts.
- Restricted - Amounts that can be spent only for specific purposes because of constraints imposed by external providers, or imposed by constitutional provisions or enabling legislation.
- Committed - Amounts that can only be used for specific purposes pursuant to approval by formal action by the Board. The District had no such amounts.
- Assigned - For the General Fund, amounts that are appropriated by the Board that are to be used for specific purposes. For all other governmental funds, any remaining positive amounts not previously classified as nonspendable, restricted or committed. The District had no such amounts.
- Unassigned - Amounts that are available for any purpose; these amounts can be reported only in the District's General Fund.

The detail of the fund balances are included in the Governmental Funds Balance Sheet on page FS-1.

Fund balance of the District may be committed for a specific purpose by formal action of the Board, the District's highest level of decision-making authority. Commitments may be established, modified, or rescinded only through a resolution approved by the Board. The Board may also assign fund balance for a specific purpose.

In circumstances where an expenditure is to be made for a purpose for which amounts are available in multiple fund balance classifications, the order in which resources will be expended is as follows: restricted fund balance, committed fund balance, assigned fund balance, and lastly, unassigned fund balance.
